MUHAMMAD SAAD ZUBAIR

Frontend Developer | AI Automation Engineer

Karachi, Pakistan • +92 336 2179891 • muhammadsaadzubair10@gmail.com • LinkedIn

PROFESSIONAL SUMMARY

Software Engineering graduate and frontend/AI automation developer with hands-on experience delivering production web applications, RESTful API integrations, relational-data workflows, real-time AI systems, and CRM automation. Strong in JavaScript, React, Next.js, Python, and PostgreSQL, with practical exposure to end-to-end development, debugging, reusable architecture, cloud deployment, and working across diverse technology stacks.

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, TailwindCSS, Bootstrap
Backend & Data: Python, RESTful APIs, Supabase / PostgreSQL, SQL & relational databases, Node.js, Pandas / NumPy
AI & Automation: OpenAI API, Google Gemini, GoHighLevel bots/workflows, Close CRM, Retell.ai, Voice AI Agents, Zapier, Webhooks
Software Engineering: Object-Oriented Programming (OOP), SDLC familiarity, API integration, reusable architecture, debugging, Vercel

FEATURED PROJECTS

Coach AI — Real-Time AI Customer-Success Coaching Platform | Live Project

- Built a production Next.js + React platform with Supabase/PostgreSQL + pgvector for CRM, knowledge-base retrieval, persistent customer memory, and REST/API-driven workflows.
- Integrated OpenAI/Gemini and a Python real-time speech-to-text engine capturing microphone and system audio; packaged a cross-platform Electron coaching overlay for Windows and macOS.
- Delivered the product end-to-end across web, data, AI, desktop packaging, and cloud deployment, including one-click Windows and macOS installers.

AI Sales Coach — Real-Time Sales-Call Coaching Platform | Live Project

- Built a related real-time coaching product with dual-side transcription, next-response guidance, objection and buying-signal detection, AI summaries, follow-up email drafting, saved meetings, and usage dashboards.

Additional Projects: Salon Website — GHL lead-generation funnel + CRM automation | Weather App — OpenWeather API + responsive UI | TaskFlow — React/Vite productivity app + persistent storage | Blog App — multi-page React app + reusable components

EXPERIENCE

Frontend Developer & AI Automation Engineer — Thelaywala.com *Jan 2026 – Present*

- Build responsive lead-capture funnels and landing pages with real-time webhooks, CRM pipelines, Meta Pixel/CAPI tracking, and automated email/SMS workflows.
- Design and maintain automation across GoHighLevel and Close CRM, including lead routing, pipelines, sequences, Zapier integrations, and webhook-driven processes.
- Configure and train conversational bots and voice agents in GoHighLevel and Retell.ai, refining prompts, call flows, knowledge/context, qualification logic, and human handoffs.

Data Science Intern — Data Zenix Solutions *Sep 2025*

- Cleaned datasets, supported analytics-dashboard creation, and delivered data insights that improved reporting efficiency and stakeholder communication.

Frontend Intern — Elevvo Pathways *Jul – Aug 2025*

- Built responsive CSS layouts and JavaScript interactivity, developed reusable React components, and improved UI performance through clean design.

Web Development Trainee — SMIT *2023 – 2024*

- Built responsive web interfaces with HTML, CSS, and JavaScript while developing clean UI design and software-development practices.

EDUCATION & CERTIFICATIONS

BS Software Engineering — Sir Syed University | 2022 – 2026
Pre-Engineering — DJ Science College | 2020 – 2022
Certifications: Web Development — SMIT (2024) • AI — HP LIFE (2025) • Frontend Dev — Elevvo Pathways (2025) • Data Science — Data Zenix (2025)
Languages: Urdu (Native), English (Fluent)
